

Always study hard in school!
You will learn many ways that you can help EP protect the Earth and our environment.

Ask your parents to ride bikes with you instead of using a car when you do chores. Using a bike instead of a car makes the air cleaner because YOU supply the energy, not a smelly old engine.

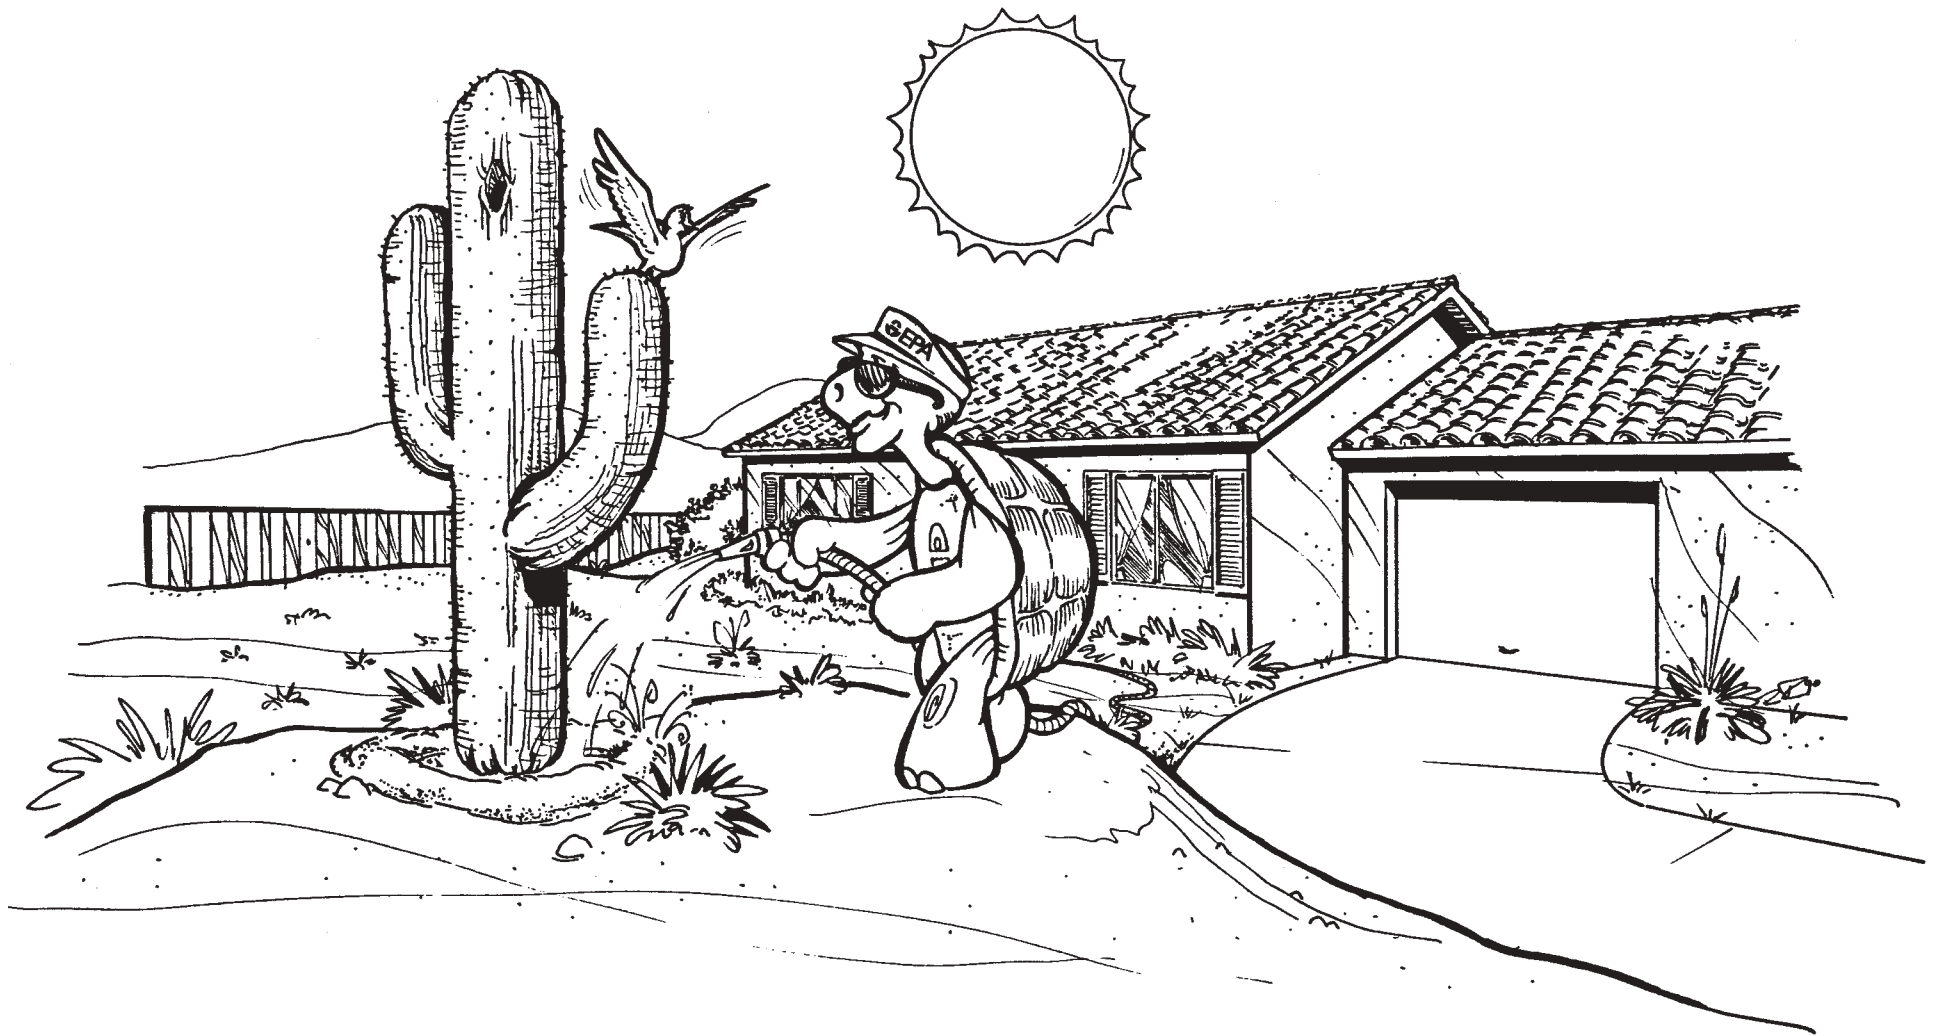

Share your old newspapers and magazines with friends instead of throwing them out.
It's like getting a book for free!

Ride the bus when you need to go a long way (like across town).
This will help keep our air cleaner because fewer cars will be on the road.
For even more fun, ask your friends to ride the bus with you!

Littering is a very bad thing to do! You can really help EP by asking your friends not to litter and by picking up trash whenever you find any.

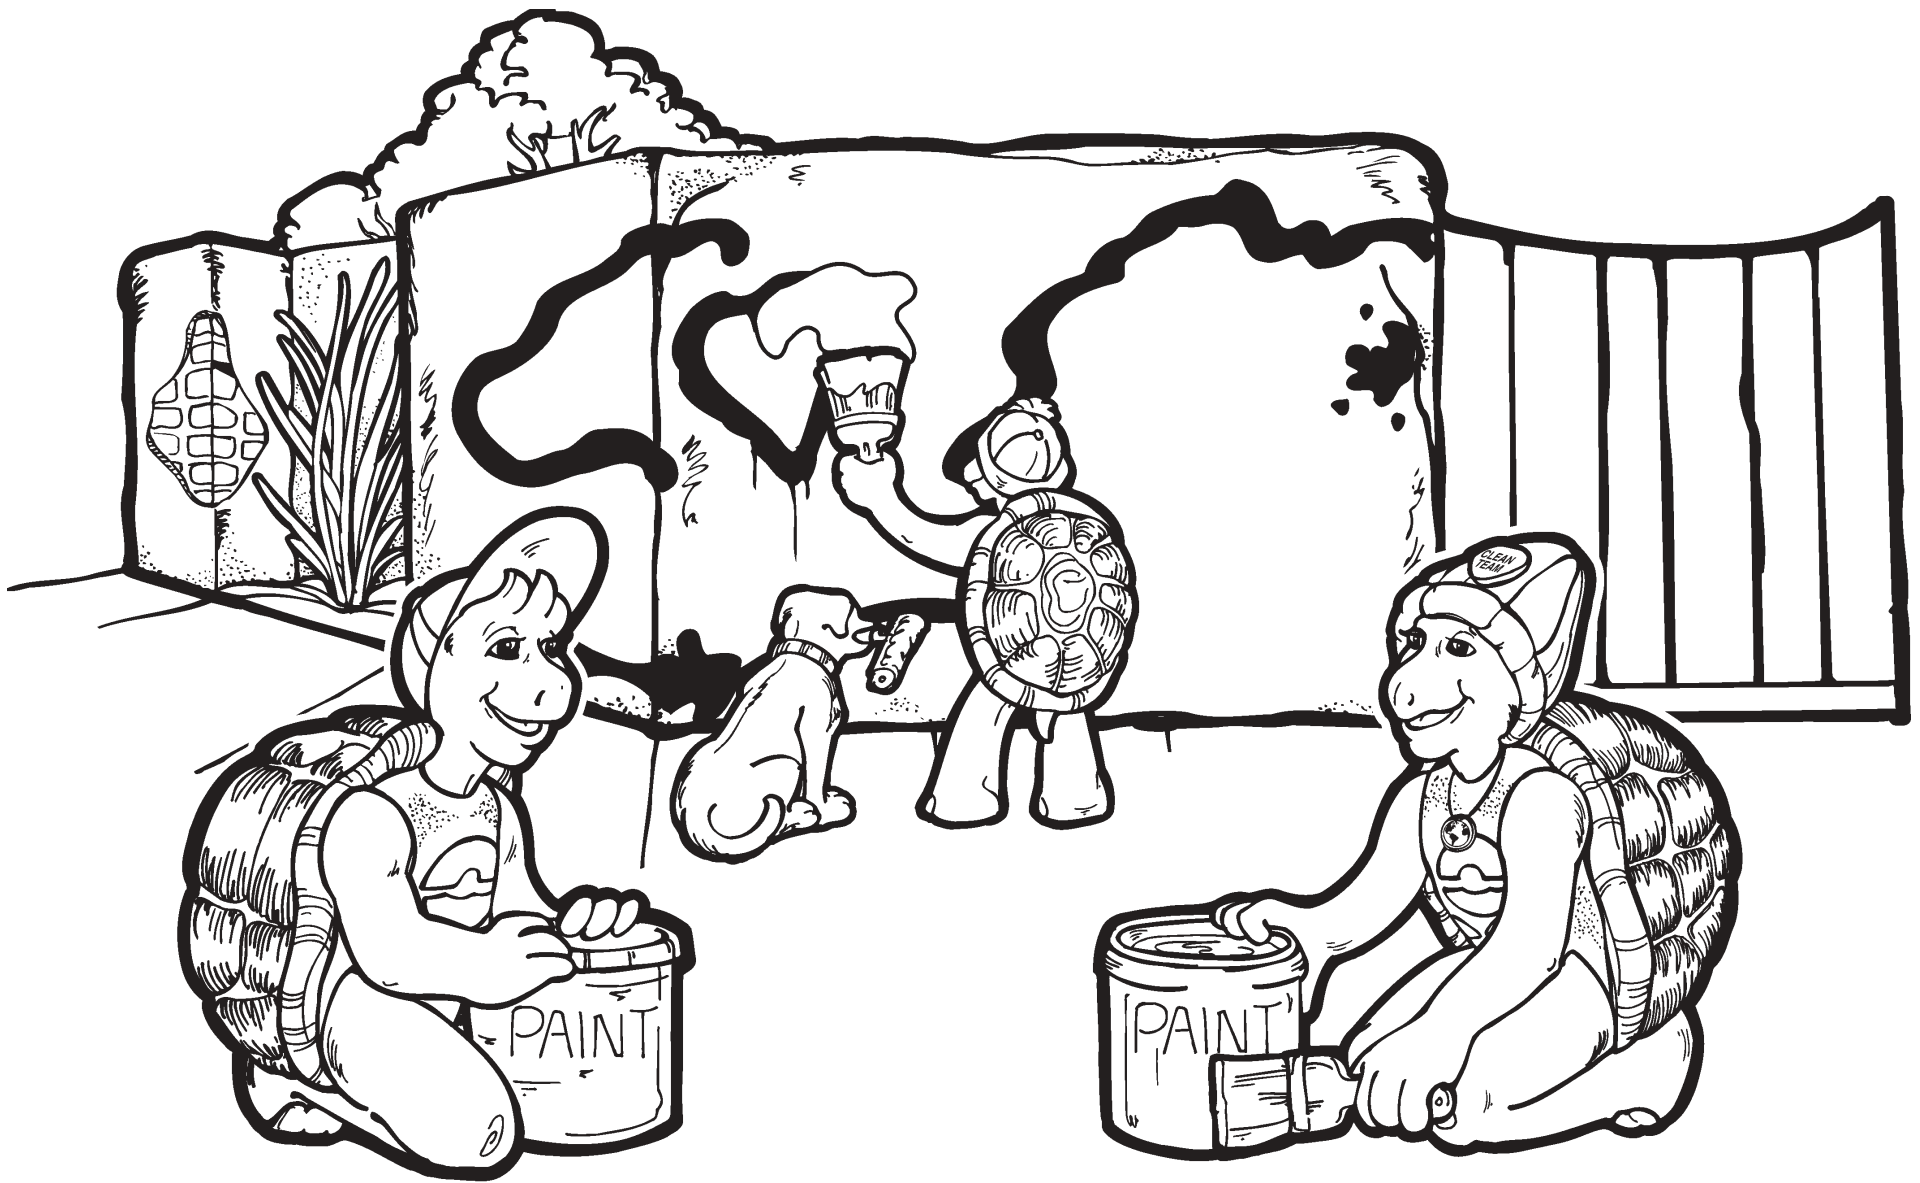

Water is a very valuable and limited resource in desert climates. We know how important it is not to waste water. You can help EP by planting trees and plants that do not need much water around your home. Grass may be pretty, but in the desert it uses a lot of water to keep growing.

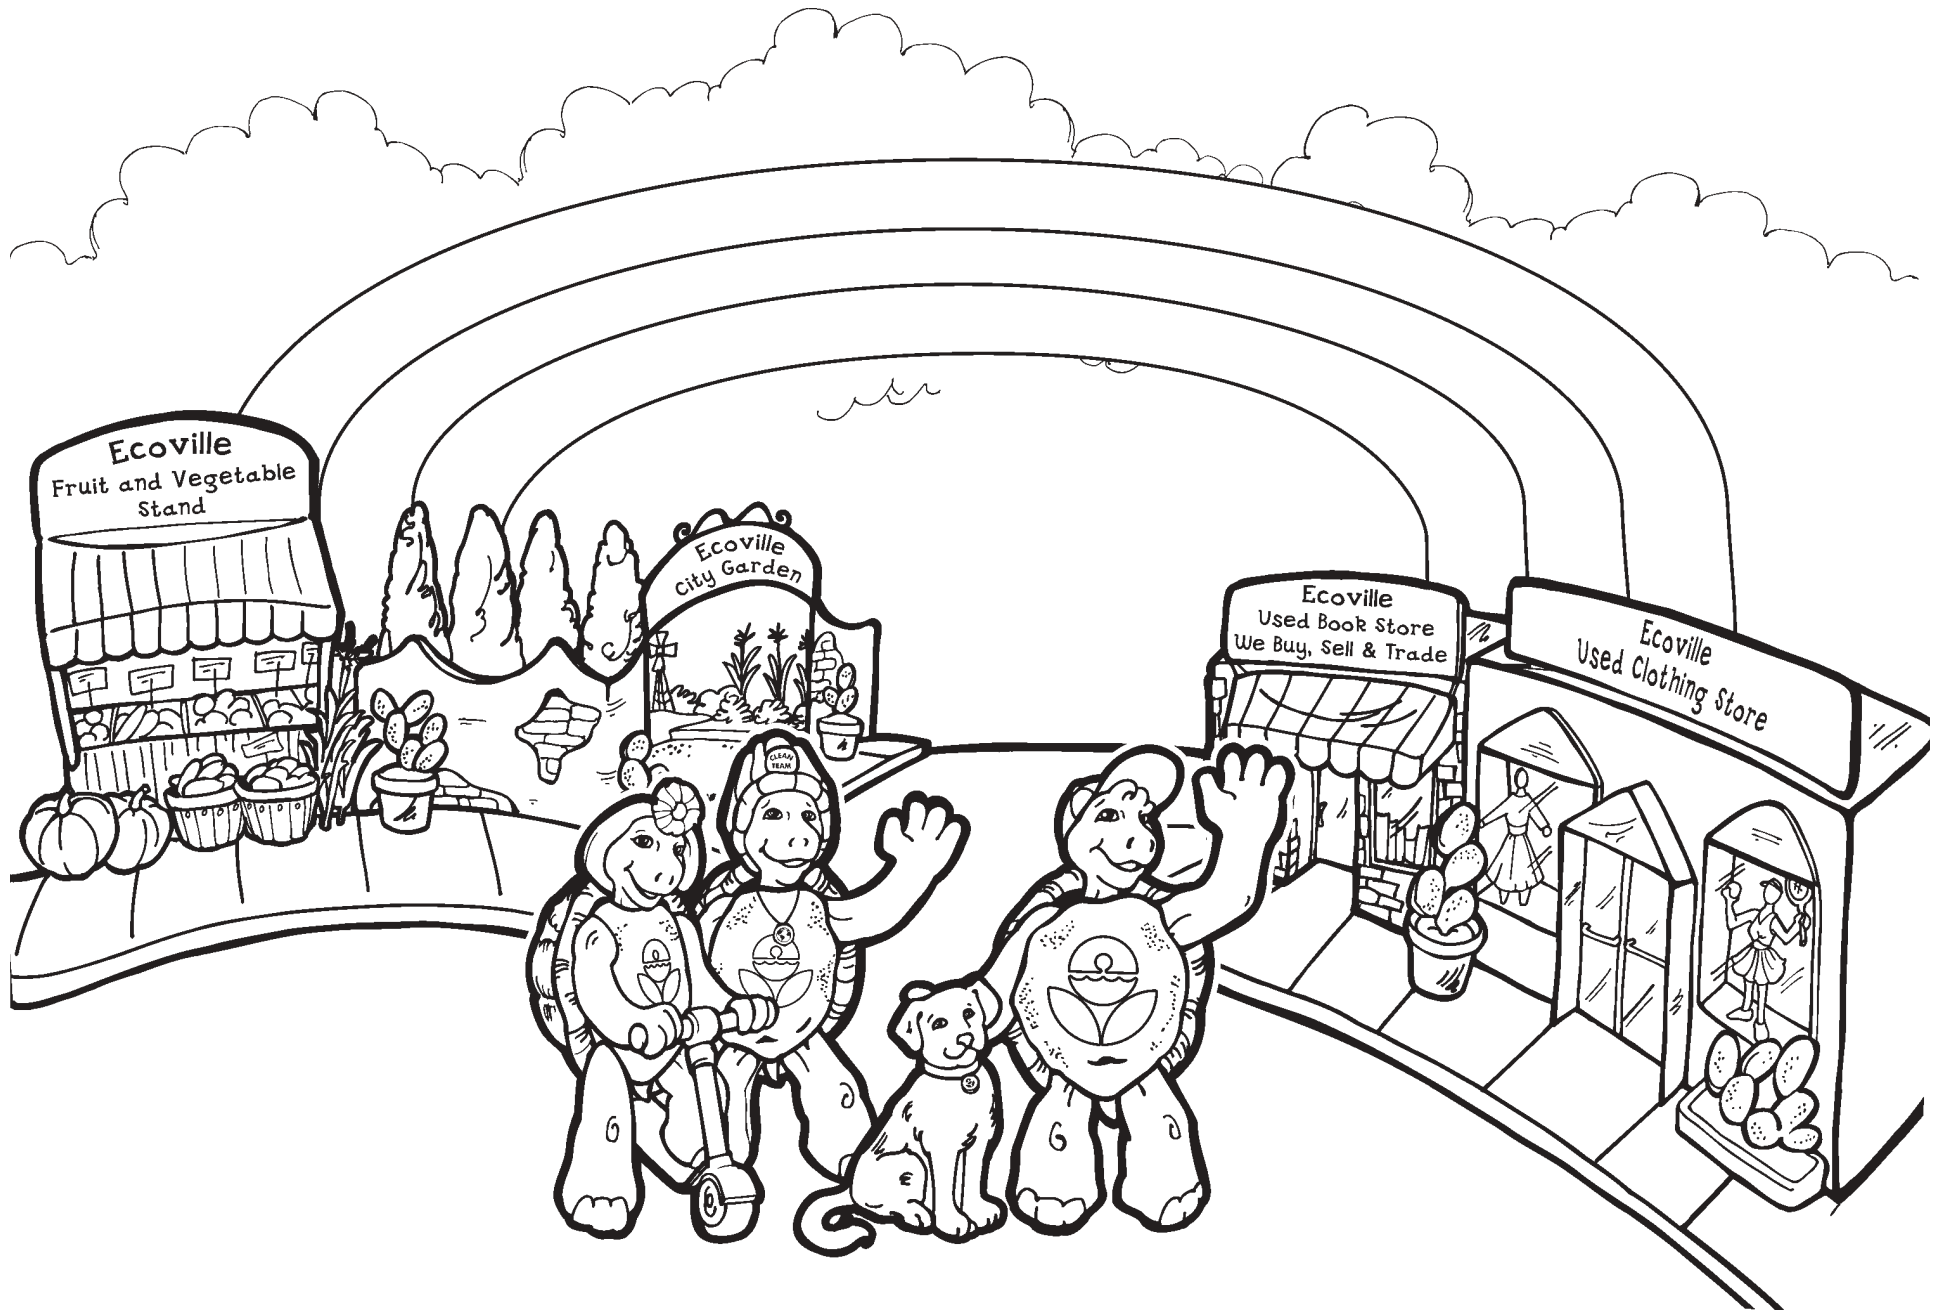

You can help EP by asking your parents to car pool to work.
Fewer cars will keep the air cleaner.

EP needs your help recycling. Do not throw away things like glass soda pop bottles, aluminum soft drink cans, newspapers, and plastic products. Instead, collect them and take them to a place that will recycle them.

Graffiti makes our neighborhoods look bad. Get together with your parents and some of your friends and paint over it. If you see someone spray painting walls in your neighborhood, tell a grownup so that he or she can call the police.

EP, the Tortoise Kids, and Eco know how important it is that we all work together.
With everybody's help, we can make the Earth a better place for all of us!
